International Taxation and
Public Finance

BUSINESS TAXATION AND PUBLIC FINANCE

ITPF –

International Taxation and Public Finance

The master program ITPF provides students with advanced knowledge, skills and methods in tax law and tax advisory, economic theory and data analysis. The program also includes topics like tax planning, economic policy, empirical research, AI applications for business taxation, corporate finance and accounting.

Is the program a fit for me?

The study program is a fit for students who are interested in the following topics:

- Taxation of businesses and individuals
- Efficiency and distributional justice of tax systems
- Empirical research and data analysis
- Economic and tax policy
- Tax complexity and simplification

Just check with the QR code that you fulfill the admission criteria!

What you will learn

- How international firms can influence their tax burdens
- How countries can use tax policy to position themselves in international competition
- If and how taxes affect investments, productivity and economic growth
- Empirical analysis of tax and economic policy
- Pathways to enhance and simplify tax systems

The analysis of tax systems promotes a broader understanding of government and society and provides magnificent career opportunities.

Prof. Dr. Sebastian Eichfelder
